Re: Screamer as an Internet Service Provider

To whom it may concern

This letter stands to confirm that Kargo National (Pty) Ltd makes use of Screamer as an Internet service provider. We have been making use of this service for approximately 2 years now.

Screamer definitely meets our requirements and we are completely satisfied with their services. We are happy with their international unshaped bandwidth offering as well as their line speeds.

The connection is very reliable and their service outstanding. As a matter of fact, we had some serious cable theft in Denver Extension 7 where our head office is situated. I contacted Craig from Screamer and within a day they had set up a connection for us. We have been using their services ever since.

I can definitely recommend them from a service as well as a support point of view. As our business runs on a 24 hour basis, we also use the Screamer line as an incoming VPN connection for all remote sites that need to connect to our network at any time of the day or night.

For any further queries please feel free to contact me.

Yours truly

Mr Chris Lazanakis
