

To whom it may concern:

This letter stands to confirm that African Bank makes use of Screamer Telecoms as a service internet provider for the past 8 Months.

I can confirm that Screamer Telecoms definitely meets our user requirements and we are satisfied with their services. Particularly the low to no contention ratio on international and local bandwidth, the speedy support responses and line speeds.

The connection to date has been reliable and the support we receive is excellent.

The Screamer Telecoms wireless solution has eliminated the risk of cable theft in our area and has been a convenient primary solution for our head office Internet connectivity.

We can definitely recommend Screamer Telecoms as a proper Telco grade service provider.

For any further queries please feel free to contact me

Kind Regards

Paul Dean
Network & Security Manager
