To Whom It May Concern

Screamer Telecommunications (Pty) Ltd were contracted to provide and install a complete Telecommunications system for the residents of Boardwalk Meander, a luxury 497 home Gated community in the east of Pretoria.

The telecommunication system was to essentially provide high speed broadband connectivity, an internal intercom solution, a CCTV solution and a telephone service to the rest of the world.

We, together with Screamer, decided to install a WiMAX based solution as it promised to be the most cost effective, least invasive and quickest to deploy. Screamer, together with their area partner, Amax completed the installation in about 3 months. As can be expected with a leading edge wireless solution of this magnitude there were initial teething problems but Screamer provided the right quantity and quality of resources to address these challenges and today we have a very stable system and are extremely happy with the decision we took.

Yours Faithfully
